Religious right fights science for the heart of America

Creationists take their challenge to evolution theory into the classroom

Al Frisby has spent the better part of his life in rooms filled with rebellious teenagers, but the last years have been particularly trying for the high school biology teacher. He has met parents who want him to teach that 5 God created Eve out of Adam's rib, and who insist that Noah invited dinosaurs aboard the ark. And it is getting more difficult to keep such talk out of the classroom.

"Somewhere along the line, the students have been told the theory of evolution is not valid," he said. "In the last

- 10 few years, I've had students question my teaching about cell classification and genetics, and there have been a number of comments from students saying: 'Didn't God do that?'" In Kansas, the geographical centre of America, the heart of the American heartland, the state-approved
- answer might soon be Yes. In the coming weeks, state educators will decide on proposed curriculum changes for high school science put forward by subscribers to the notion of "intelligent design", a modern version of creationism. If the religious right has its way, and it is a
- 20 powerful force in Kansas, high school science teachers could be teaching creationist material before long. Similar classroom confrontations between God and science are under way in 17 states. In Georgia you can even find stickers on school textbooks warning: "This
- 25 textbook contains material on evolution. Evolution is a theory, not a fact, regarding the origin of living things."
 For the conservative forces engaged in the struggle for America's soul, the true battleground is public education, the laboratory of the next generation, and an opportunity
- 30 for the religious right to effect lasting change on popular culture. In recent years opponents of evolution have regrouped, challenging science education with the doctrine of "intelligent design" which has been carefully stripped of all references to God and religion. Unlike
- 35 traditional creationism, which posits that God created the earth in six days, proponents of intelligent design assert that the workings of this planet are too complex to be ascribed to evolution. There must have been a designer working to a plan that is, a creator.
- 40 Supporters of intelligent design have appealed to a sense of fair play, arguing that it would be in their children's interest to be exposed to all schools of thought on the earth's origins. "We are looking for science standards that would be more informative, that would open the
- 45 discussion about origins, rather than close it," said John Calvert, founder of the Intelligent Design network, the

- prime mover in the campaign to discredit the teaching of evolution in Kansas.
- Other supporters of intelligent design go further, saying evolution is as much an article of faith as creationism. "Certainly there are clear religious implications," said William Harris, a research biochemist and co-founder of the design network in Kansas. "There are creation myths on both sides. Which one do you teach?"
- 55 Jack Krebs, a high school maths teacher, argues that the campaign against evolution amounts to a hidden assault on the entire body of scientific thought. "There are two planes where they are attacking. One is evolution, and one is science itself," he said. "They believe that the
- 60 naturalistic bias of science is in fact atheistic, and that if we don't change science, we can't believe in God. And so this is really an attack on all of science."
- It would certainly seem so in Kansas. At the first of a series of public hearings on the new course material, the audience was equally split between the defenders of established science, and the anti-evolution rebels. The breakdown has educators worried. With the religious right now in control of the Kansas state school board, the
- 70 In a crowded high school auditorium, biology teachers, mathematicians, a veterinarian, and a high school student made passionate speeches on the need for cold, scientific detachment, and the damage that would be done to the state's reputation if Kansas became known as a haven for

circumstances favour the creationists.

- 75 creationists. They were countered by John James, who warned that the teaching of evolution led to nihilism, and to the gates of Auschwitz. "Are we producing little Kansas Nazis?" he asked. But the largest applause of the evening was reserved for a silver-haired gentleman in a navy blue
- 80 blazer. "I have a question: if man comes from monkeys, why are there still monkeys? Why do you waste time teaching something in science class that is not scientific?" he thundered.
- Science teachers believe that the questioning of the intelligent design movements masks a larger project to discredit an entire body of rational thought. If the Kansas state school board allows science teachers to question evolution, where will it stop? Will religious teachers bring their beliefs into the classroom?
- 90 "Anti-evolutionists are trying to create a climate where anything an individual teacher wants to include in science class can be considered science," said Harry McDonald, a retired biology teacher. "They want to redefine science."

KANTON	Schriftliche Maturitä	tsprüfung Englisch 2011
LUZERN 	Name:	Klasse:
Bildungs- und Kulturdepartement		

1 Comprehension

(40 points)

1.1	True or false?	(16 points)
	following statements are either true or false with respect to the article you have just read k those that are true with a T, and those that are false with an F.	
(1)	Al Frisby has recently been trying to work together with his students' parents more.	
(2)	Cell classifications and genetics are part of the theory of evolution.	
(3)	Kansas teachers have been teaching creationism for a long time.	
(4)	Public education is where the religious right fights to change popular culture.	
(5)	Intelligent design refers to God as the creator of the earth in six days.	
(6)	Proponents of intelligent design claim to support science with fairness and open discussion.	
(7)	The religious right accuses scientists of atheism.	
(8)	For William Harris evolution includes myths.	
(9)	Jack Krebs worries that science is naturally biased.	
(10)	A Kansas maths teacher defends scientific detachment.	
(11)	The first schoolbook hearing in Kansas had no majority for evolution in the audience.	
(12)	A silver-haired gentleman was opposed to wasting time in science class on evolution.	
(13)	Many in the audience do not believe man and monkeys have common ancestors.	
(14)	Intelligent design movements target all science and reason, teachers worry.	
(15)	John James gives specific arguments to support his view that the teaching of evolution leads to	nihilism.

1.2 Open comprehension questions

(16) Harry McDonald teaches science every year.

(24 points)

Answer the following questions in your own words. Do not copy whole passages from the article. Each answer should be between 40 and 60 words. Write your answers in full sentences on a separate sheet.

- (1) Explain three ways in which the religious right has modified its notion of creation over the past twenty years. (6 points)
- (2) Why should "intelligent design" (ID) be taught at school? Sum up three arguments its advocates put forward. (6 points)

KANTON■		Schriftliche Maturit	ätsprüfung Englisch 2011
LUZERN ■ J		Name:	Klasse:
Bildungs- und Kulturdepartemen	t		

- (3) Analyse how the text reflects the writer's attitude to creationist ideas. Give evidence from the text. (6 points; for each commented quote 1 point)
- (4) Explain the various meanings of the expression "heart" of America as used in the headline and the text (cf. line 14) (6 points)

2 Vocabulary

(30 points)

2.1 Word formation (12 points)

In the following text, use **one** word that fits the gap and belongs to the same **word family** as the word in CAPITALS.

Dar	win's theory of evolution by natural selection has been profoundly	
(1).	among (2) and	INFLUENCE; SCIENCE
oth	ers on both sides of the Atlantic from the time of its	
(3) .	An American botanist, Asa Grey, was among the	INTRODUCE
sele	ct group of naturalists with whom Darwin corresponded about his work even	
pric	r to his (4) to publish his theory. There were	DECIDE
deb	ates over the theory's meaning and (5) already	IMPLY
befo	ore 1859, the year of its (6) in Britain. Americans	PUBLISH
con	tributed some very (7) evidence in support of	SIGN
Dar	win's work, but despite the generally enthusiastic	
(8)	of Darwin's work by Americans, very few of	RECEIVE
the	m embraced his theory in all its details. The question was whether natural	
sele	ection alone drove the evolution of species, or whether the	
(9) .	of acquired characteristics was possible. Darwin	INHERIT
him	self (10) embraced the latter view; however, till	INCREASE
the	end of his life he didn't manage to (11)a	PROVISION
(12)	account of how characteristics passed from	CONVICTION
one	generation to another.	
2.2	2 Antonyms	(8 points)
Fin	d the word that is opposite in meaning to the word in bold print.	
(1)	Darwin corresponded about his work prior to publishing his theory.	
(2)	People were quick to engage in debates over the theory's meaning.	
(3)	Many people embraced his theory.

4 Grammar (50 points)

4.1 Re-phrasing sentences

(20 points)

Complete the second sentence so that it has **a similar meaning** to the first sentence, using the word given. Do **not** change the word given. You must use **between three and eight words**, including the word given. There is an example (0) at the beginning.

(0)	When does the next exam begin? (tell) Couldyou tell me when the next exam begins?
(1)	Supporters of "intelligent design" (ID) argue that it would be in their children's interest to be exposed to all school of thoughts on the earth's origins. (want) Supporters of ID
(2)	We will probably solve some of the open questions around the theory of evolution in the future. (likely) Some of the open questions around the theory of evolution in the future.
(3)	John James asked: "Are Kansas schools producing little Nazis?" (know) John James
(4)	Darwin's ground-breaking book "The Origin of Species" is more difficult than I thought. (as) Darwin's ground-breaking book "The Origin of Species"
(5)	When Darwin lived near London, taking a walk was part of his daily routine. (used) When Darwin lived near London
(6)	Darwin was not a very good speaker so he didn't defend his theory himself. (if) better speaker he
(7)	Al Frisby said: "Teaching ID is new to me". (never) Al Frisby said he
(8)	The expert didn't know all the answers, though he pretended to. (acted) The expert
(9)	"I'll resign if I can't teach biology the way I believe is right", one teacher said. (threatened) One teacher
(10)	This controversy cannot be solved instantly. (no) There is this controversy

4.2 Gap-filling (30 points)

Complete the following text by putting the verbs in brackets into the correct form. Where there is no verb given, think of **one** word which best fits the gap.

Charles Darwin, naturalist (1809 – 1882)

Charles Darwin was bor	rn on the same day (0)as	Abraham Lincoln and (00)	became (become)
famous for his theories	of evolution and natural selection.	He (1)	(baptise) in the Anglican
Church, but as a child (2	2) a school r	un (3)	a Unitarian preacher. If his
father (4)	(not be) a doctor, he (5) .	(may	/ not study) medicine, but
in 1825 he (6)	(send) to the Univers	ity of Edinburgh Medical Sc	chool. His father hoped he
(7)	(work) hard, but was very disap	pointed when Charles negle	ected his studies. Even after
(8)	transferred to Christ's College, C	Cambridge, for a B.A. degree	e, he preferred
(9)	(ride and shoot) (10)	his studies. It w	as only when his exams
drew near that he start	ed applying himself, (11)	enabled him t	o graduate in 1831.
When he (12)	(invite) by Capt. FitzR	loy to accompany him on a	n expedition to South
America, he agreed at o	once, although he (13)	(never be) at sea	before. His father at first
objected (14)	the two-year voyage,	(15)	(regard) it as a waste of
time, but in the end (16	5) (persuade) by his family to support hi	s son.
When his book "The Or	rigin of Species" (17)	(publish) in 1859, h	ne (18)
(work) on it (19)	over 20 years, i.e.	since his return from the "E	Beagle"- expedition. His
health had suffered (20)) the pressu	re of hard work, and if in 18	339 he
(21)	(not marry) his cousin Emma, v	who looked (22)	him well, he
(23)	(not live) to an old age. (24)	she wa	is devoted to Charles, she
couldn't agree to his re	volutionary theories and expressed	I concern that his unorthod	ox views
(25)	(may) separate them in the aft	erlife.	
Darwin's work (26)	(have) a tremen	ndous impact on religious th	ought until the present day.
His idea of evolution (2	7) (oppose)	at the beginning, and it is s	till
(28)	(debate) at present, particularl	y in American society. It is t	to (29)
(expect) that the debat	e (30) (cont i	i nue) for years to come.	

5 Translation (20 points)

Translate the following sentences into English.

William Jennings Bryan (1860 – 1925)

- (1) W.J. Bryan, der ein amerikanischer Politiker des späten 19. und frühen 20. Jahrhunderts war, war bekannt für seine ausgezeichneten Reden.
- (2) Dreimal versuchte er, als Kandidat der demokratischen Partei zum Präsidenten der USA gewählt zu werden, wurde aber jedes Mal von seinem republikanischen Gegner geschlagen.
- (3) Unter Präsident Wilson war er zwei Jahre lang Aussenminister, trat aber zurück, weil er mit Wilsons Aussenpolitik nicht einverstanden war.
- (4) Seiner Meinung nach hätten die USA im Ersten Weltkrieg neutral bleiben sollen; er wollte nicht, dass sein Land in den Krieg gegen Deutschland eintrat.
- (5) Bryan war einerseits ein liberaler Politiker, der für soziale Reformen kämpfte; anderseits unterstützte er die fundamentalistische Bewegung, die jede moderne Interpretation der Bibel ablehnte.
- (6) Aus diesem Grunde nahm er (1925) aktiv am Prozess gegen John Scopes teil, der als Biologielehrer Evolutionstheorie gelehrt hatte, was gegen das Gesetz war.
- (7) Das öffentliche Interesse am Prozess wäre vielleicht nicht so gross gewesen, wenn Bryan eine weniger prominente Persönlichkeit gewesen wäre.
- (8) Weil seine religiösen Ueberzeugungen so stark waren, machte es Bryan nichts aus, von gebildeten Leuten als ignorant verlacht zu werden.
- (9) Obschon Bryan den Prozess gewann, half dies der fundamentalistischen Bewegung nicht, weil es immer offensichtlicher wurde, dass die Evolutionisten die besseren Argumente hatten.
- (10) Seither ist dieser Prozess als "Affenprozess" bekannt und gilt immer noch als einer der berühmtesten Prozesse in der amerikanischen Geschichte.
